QUANTUM TECHNOLOGY

27 June 2022, 11am EST

Dr. Mithuna YOGANATHAN

PHD in Quantum Physics from Cambridge University; Science Educator

Dr. Mark JACKSON

Senior Quantum Evangelist at Quantinuum

André KÖNIG

CEO of Inference Advisors, Chairman of OneQuantum; Managing Partner of Entanglement Capital

The peculiar properties of particles at the atomic level can be harnessed to provide new technologies, even a new type of computers. How does this work and what are the implications?

Three world class experts will discuss the fundamentals of quantum physics, real world expectations and future possibilities - how they may impact the world and what it means for the UN.

Presented By

TECH SALONS

A series of events focusing on important technologies and their impact on the UN, sustainable development and the future of the world. Open and free to attend for anyone, and featuring experts from academia and private and public sectors.
